PROFILE

Computer Science Engineering student skilled in full-stack web development, data structures, and machine learning. Experienced in building real-time web applications using Node.js, MongoDB, and JavaScript.

EDUCATION

Graphic Era University
Bachelor of Technology in Computer Science & Engineering

Dehradun, Uttarakhand, India
July 2022 – July 2026

R.S.D. Academy
Intermediate

Moradabad, Uttar Pradesh, India
2021

PROJECTS

Full-Stack Job Portal July 2025 – Present

- Deployed a comprehensive recruitment platform using Node.js and MongoDB, supporting 1,000+ concurrent active sessions with 99.9% system availability.
- Streamlined the application workflow by integrating Multer for secure document uploads and building a real-time tracking dashboard.

ML-Based Malware Detection May 2024 – July 2024

- Trained a classification engine on 85,000+ Windows executables using Random Forest and Neural Networks, reaching a 93.5% detection accuracy.
- Utilized Seaborn for statistical analysis to resolve data skewness, lowering false positive rates from 20% to 5%.

Intermediate-Code-Generation September 2025 – December 2025

- This project is a mini-compiler backend sandbox written in modern C++. In this we can run one or more arithmetic expressions. This outputs every intermediate representation, so it is ideal for learning, demos, or quick prototyping of additional optimization passes.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, HTML, CSS
Databases: MySQL
Dev Tools: Git, GitHub, RESTful APIs
Core CS: Data Structures, Algorithms, Operating Systems, DBMS

ACHIEVEMENTS & CERTIFICATIONS

- Mastering generative AI and ChatGPT(5 Weeks)).
